Regenerative medicine for
improved quality of life.

Geistlich
Pharma

Scientifically based
regenerative medicine.

“Our developments open up new approaches time and time again. Our aim is to help patients regain quality of life. Every new development is tested until we are completely convinced of its quality. Numerous scientific studies document our products’ positive properties and gain the trust of our partners and customers.”

Paul Note, CEO Geistlich Pharma AG

We build upon employees,
technology and research.

Geistlich Pharma is a leading company in regenerative medicine and continuously invests in expanding research and technology.

The Wolhusen and Root sites are growing steadily. A worldwide network of foremost scientific opinion leaders helps the company nurture an intensive exchange of ideas.

Regenerative biomaterials for bone and tissue regeneration in dentistry.

Strong bone and tissue
for healthy teeth.

The pioneering products **Geistlich Bio-Oss®** and **Geistlich Bio-Gide®** lead the world market in regenerative dentistry.

Every 18 seconds, Geistlich products are used worldwide in the restoration of bone or for healing soft tissue. **Geistlich Mucograft®** was specially developed for gingival regeneration.

Matrix structures for bone and cartilage regeneration in orthopaedics.

Outstanding in biological
regeneration.

Geistlich Surgery produces innovative products for bone and cartilage regeneration. These include **Orthoss®**, **Orthoss® Collagen** and **Chondro-Gide®**. The products support the body's self-healing process.

AMIC, a method of cartilage regeneration based on Chondro-Gide®, is regarded internationally as the state of the art.

Pharmaceutical and medical devices for selected application areas.

Fitness for body and mind.

Geistlich Medical offers prescription medicines, OTC (over-the-counter) products and medicinal products.

With its proven products, Geistlich Medical focusses on long-term patient health and quality of life.
