

PATIENT INFORMATION
**WHEN YOUR BACK TEETH
ARE MISSING**

Sinus Floor Elevation

DENTAL TREATMENTS ARE A MATTER OF TRUST

OUR EXPERIENCE AND EXPERTISE IS SOMETHING YOU CAN RELY ON

Over 10 million patients worldwide have been treated with Geistlich biomaterials. Let us share some facts with you about these products:

- › Geistlich products are scientifically proven top quality Swiss biomaterials.
- › Meticulous selection of raw materials, together with a strictly controlled manufacturing process, allows Geistlich biomaterials to conform to high safety requirements and ensures high tolerability.

GEISTLICH BIOMATERIALS

- › Your worldwide no. 1 reference^{1,2}
 - › Outstanding quality^{3,4}
 - › Unique biofunctionality⁵⁻⁸
- › These natural biomaterials were evaluated in more than 1,000 studies from countries all over the world.
 - › The safety has been assessed by international and national authorities.

WHY IS A TREATMENT BENEFICIAL?

OPTIMISED BONE HEIGHT

Basis for stable implants.

PIONEERING SOLUTION

You may avoid complicated procedures in the future.

STABLE OUTCOMES

Preventive procedures following tooth loss save you time and money in the long-term by preventing further grafting procedures.⁹

Lack of bone height for restorative measures.

Availability of sufficient bone height for implant placement.

WHAT HAPPENS WHEN YOUR BACK TEETH ARE MISSING?

After dental extraction, the height and thickness of the jaw bone diminishes. Sufficient bone is essential to ensure the long-term stability of your dental implants.

GAIN IN BONE HEIGHT

In the back teeth area, a procedure called sinus floor elevation leads to higher bone level for a secure insertion of implants. Your dentist will choose a suitable technique adapted for you and your clinical situation.

HOW CAN BACK TEETH BE RESTORED?

Lack of bone height

If there is insufficient bone available (↓), implants cannot be firmly anchored.

Sufficient bone height

Geistlich Bio-Oss® and Geistlich Bio-Gide® are the regenerative materials of choice when you need a sinus floor elevation.

Bone regeneration procedures are necessary to establish a sufficient bone height (↑) as a basis for secure implants.

GEISTLICH BIOMATERIALS

Human bone possesses the ability to regenerate, in other words, to rebuild missing bone. In most cases it still needs assistance through a scaffold which serves as a template. The natural Geistlich products support the body's own bone regeneration processes effectively.

GEISTLICH BIO-OSS® STABILIZES & SUPPORTS BONE REGENERATION

- › Providing a foundation for your body to regenerate bone.
- › Made from the mineral part of the bones originating from Australian and New Zealand cattle.
- › Swiss quality, refined through 30 years of experience.

GEISTLICH BIO-GIDE® PROTECTS & SUPPORTS WOUND HEALING

- › Supports wound healing and provides a barrier for optimum regeneration of bone.
- › Made from collagen extracted from healthy pigs.
- › Swiss quality, refined through 20 years of experience.

BACK TO A HEALTHY SMILE

Post-operative care is an area where you can contribute to the success of your procedure.

DO'S

- › Maintain your oral hygiene and use antibacterial mouth wash as prescribed by your dentist.
 - › Treat swelling with moist-cold pads.
 - › Consult your dentist regarding pain.
 - › Make sure that you visit your dentist for a follow-up appointment.
-
-

DONT'S

- › Do not neglect your oral hygiene.
 - › Do not brush or floss at the site of surgery for 1 week after surgery. A toothbrush with especially soft bristles can usually be used for cleaning the teeth in the vicinity of the wound.
 - › Do not drink coffee or alcohol and do not smoke cigarettes for 2-3 days after surgery.
-
-

Biomaterials from Geistlich Pharma AG are the most frequently used materials in regenerative dental medicine throughout the world:¹⁰

More than 10 million

GEISTLICH BIO-OSS®

More than 4.5 million

GEISTLICH BIO-GIDE®

More than 80,000

GEISTLICH MUCOGRAFT®

More than 24,000
